

Where the 4,587-unit gap sits

Weighted 2019–2022 benchmark minus observed 2025–2026; 310 parents in each distribution

Left: more units in the observed post period. Right: more in the historical benchmark.

Each period uses its own observed size bins; bars do not track individual project changes.

Post period: January 2025 through July 8, 2026. Exact units retained above 300.
